

M&A Cybersecurity Due Diligence Assessment

DON'T LET CYBER RISK IMPACT YOUR VALUATION

Business disruption caused by cyberattacks is a real concern. 50% of organizations surveyed reported experiencing disruptions caused by cyber incidents. Imagine how that could blow up in the midst of an M&A operation.

Cyberthreats can have the following consequences for buyers:

Stock Devaluation

Cyberattacks have an impact on brand reputation for acquiring companies.

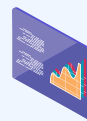

Regulatory Risks

Cyberattacks trigger fines and regulatory headaches.

Operational Disruptions

Cyberattacks lead to operational shutdowns, costing millions.

Why CybelAngel?

Qualitatively superior cybersecurity due diligence report based on real-world data and cutting-edge technology.

Clear action plan for the integration phase to remediate any identified gaps.

Increased buyer satisfaction leading to renewed trust for future M&A.

Assurance of an informed recommendation regarding cybersecurity exposure.

With CybelAngel, we establish a new border of detection outside of our architecture, encompassing the world of our partners and suppliers, where we can't, by design, take control of their security.

JEAN-YVES POICHOTTE
HEAD OF GROUP CYBERSECURITY, SANOFI

THE CYBERSECURITY DUE DILIGENCE ASSESSMENT INCLUDES:

Target's cybersecurity exposure score and assessment.

Benchmarking to industry peers

Detailed analysis by incident, including severity and risk typology.

Expert recommendations for remediation of identified vulnerabilities.

GET A FULL OVERVIEW ON:

- Confidential information weaponized for industrial espionage
- Exposed credentials leading to financial fraud or account takeover
- Dark Web exposure leveraged for network attacks
- The origin and content of leaked documents
- Counterfeiting schemes and phishing attacks
- Shadow IT used to launch ransomware attacks

Are you willing to gamble with your rate of return?

Didn't think so. CybelAngel assessments will ensure you:

- Make educated calls on M&A operations
- Optimize target valuation
- Prepare for integrations by extending security standards

All of this is powered by our External Risk Protection platform and our unique combination of AI and human expertise. Built on trust since 2013.
